## **HEATING ELEMENT BUTT WELDING TWO-RING MACHINE 250 mm and 315 mm**

In connection with WIDOS aquatherm has developed a new two-ring machine for heating element butt welding.

It is a machine for the building site and designed specifically for use in the field as well as for the workshop. Therefore the machine is kept small, so that it can be used in exigencies, e.g. in trenches or in the ceiling area. With the small jaws a processing, e.g. with the aquatherm pipe system ti with rigid foam insulation is possible in all situations.

### **Available now!**

Art-No. <b>50350</b>	Two ring machine	160 mm - 250 mm

## www.aquatherm.de NEW WEBSITE ONLINE

Two years after the successful rebranding of aquatherm the company presents a completely updated web site with a lot of extensive add-ons and an abundance of information.

Each aquathermsystem has its own area and is presented beside a general introduction in complete detail - from application and various installation examples to special-purpose solutions, informative texts including a list with all available articles are provided.

New processing videos explain the correct installation of a system step by step. A written instruction can be taken from the technical catalogue which can be browsed online or downloaded as a pdf.

By a permanent current view of awards, fascinating projects or new products you are kept updated about the aquatherm-world - part of this is the webcam showing the ZuRo-construction site -, about which we informed in technews No. 1 2015.

Lists about our locations, representations and contact details help to find the right contact person for your requests, of course in various languages.
