ISH – optimum combination of water and energy

ISH – The World's Leading Trade Fair for The Bathroom Experience, Building Services, Energy, Air Conditioning Technology and Renewable Energies – is the world's biggest exhibition for the combination of water and energy. With everything from sustainable sanitation solutions, innovative bathroom design and energy efficient heating technologies combined with renewable energies to environmentally friendly air-conditioning, cooling and ventilation technology, the world's leading trade fair covers all aspects of future-oriented building solutions in both horizontal and vertical terms.

Over **2,400 exhibitors**, including all market leaders from home and abroad, launch their latest products, technologies and solutions onto the world market at ISH. For five days, international trade visitors from the installation trade, retail trade, firms of engineers and architects, housing and property companies, service providers, public authorities and universities meet at Messe Frankfurt's fully-booked up Exhibition Centre (**250,000 m²**). The largest group of visitors at ISH is the sanitation, heating and air-conditioning installation trade.

The world's leading trade fair for the sector made its debut over 50 years ago – more than five decades standing for growth, continuity and a successful concept. In a nutshell: a half-century success story.
