

VOYAGES AYERS ROCK SAILS IN THE DESERT HOTEL AYERS ROCK RESORT

CHILLED & HEATING HOT WATER PIPING REPLACEMENT

Over a number of years the existing mild black steel chilled water and heating hot water services, which were installed in the service tunnel within the Sails in the Desert Hotel at the Ayers Rock Resort, Yulara, NT, had deteriorated to an unmanageable situation where the old steel piping system is continually developing leaks.

The existing chilled water and heating water flow and return piping were replaced with aquatherm blue pipe SDR11 MF pipe system, complete with insulation.
