

MANIFOLD CONSTRUCTION - CUSTOM MADE

Time is money – a maxim coming true every day especially in the building industry. The plumbing and heating installation of each construction project is always a temporal and logistical challenge - not only for the architect and planner.

The realization at site is often a problem for the site managers. Neither the external circumstances nor the temporal requirements allow them to concern detailed with the construction of a complicated manifold.

In addition there are high costs for the temporary expenses and diverse problems at site, which in most cases can only be solved by higher expenses. Now, aquatherm offers an alternative to its customers.

Save time and money

We design and construct your complete manifolds in our company according to your specifications and dispatch them pre-finished to any place of the world.

You only have to send us the respective drawings and / or sketches with specifications. We return the offer including material list and drawing. A qualified team of experienced technicians likes to assist you.

For detailed information referring "manifold construction" please contact our technical hotline: +49 (0) 2722 950-200!

aquatherm pipesystems for the manifold construction!

aquatherm green pipe

The pipe system has proved its excellent technical suitability in worldwide applications for more than 30 years and is highly recognized by experts as one of the most extensive and at the same time best plastic pipe systems. The system includes the different types of pipes SDR 6, SDR 7.4, SDR 9 and SDR 11.

More than 450 joining and connection elements as well as valves and ball valves complete the system. The products are available from 16 mm to 450 mm external diameter.

aquatherm blue pipe

The aquatherm blue pipe system has been developed especially for applications outside the potable water installation. In addition to the general advantages of the PP-R pipe system aquatherm blue pipe in comparison with the aquatherm green pipe system offers higher volumetric current values due to smaller wall thickness. The system includes the different types of pipes SDR 7.4, SDR 11 and SDR 17.6 available from 20 mm to 630 mm external diameter.

aquatherm red pipe

The flame-resistant aquatherm red pipe system is applied as line and manifold system in water extinguishing systems. Corrodible and very maintenance-intensive metal sprinkler systems thus belong to the past. aquatherm red pipe is the first plastic pipe system in Germany certified by the VdS.
